

FOSD — Unit 9

Specialized OS

GATE CSE PYQ coverage check • 2017–2026

Result of source-paper verification

No GATE CSE question in the supplied 2017–2026 source set was identified as a direct, explicit question on Real-Time OS, Embedded OS, or Mobile OS. Therefore, no unrelated scheduling/memory/I/O question has been mislabelled as a Specialized-OS PYQ. This PDF is intentionally a coverage note rather than a fabricated question bank.

The 2017 Set-1 file supplied in the ZIP was also unreadable/corrupted, so it was not used to infer missing coverage.
